Seeking PFE Internship in Data Science | Data Engineering | Big Data | Business Intelligence

Education

ISAMM – Inst. Supérieur des Arts Multimédia de La Manouba — Tunis, Tunisia
B.Sc. Big Data & Data Analytics (BDAD) – Expected 2027 — *2025 – Present*

Lycée — Tunisia
Baccalauréat – Major: Computer Science — *2024*

Experience

Tunisie Telecom – Direction Centrale des Systèmes d'Information — Tunis, Tunisia
Data Science / Big Data Intern — *2026*

Telecom Customer Churn Prediction | *Python, PySpark, Spark MLlib*

- Built a customer churn prediction pipeline using a public telecom dataset, including data preprocessing, exploratory analysis, and customer risk segmentation
- Compared Logistic Regression, Random Forest, and Gradient-Boosted Trees, achieving a ROC-AUC score of 0.93

Academic Projects

Big Data & Cybersecurity Analytics | *Hadoop, HDFS, MapReduce, Spark, PySpark, Docker, Streamlit* — 2026

- Deployed a multi-node Hadoop cluster with Docker; engineered distributed MapReduce and PySpark pipelines to process large-scale network traffic datasets
- Built an interactive Streamlit dashboard for real-time ransomware trend analysis and visualization

Job Salary Prediction & Data Mining | *Python, Pandas, Scikit-Learn, K-Means, Decision Trees* — 2026

- Cleaned and engineered features from a real-world job market dataset; performed exploratory data analysis
- Applied K-Means clustering for job segmentation and Decision Tree regression for salary range prediction

ML Algorithms Benchmarking | *Python, Scikit-Learn, NumPy, Matplotlib, Seaborn* — 2026

- Implemented KNN, K-Means, Random Forest, and SVM; evaluated models using precision, recall, F1, and accuracy
- Produced a comparative report highlighting trade-offs in performance, complexity, and scalability

World Happiness Statistical Analysis | *R, ggplot2, Statistical Modeling* — 2026

- Conducted multiple linear regression, PCA, ANOVA, and K-Means clustering on UN happiness dataset in R
- Identified key socioeconomic predictors of national happiness; presented findings with publication-quality plots

Technical Skills

Languages: Python, SQL, Java, R, C, C++
Big Data: Hadoop, HDFS, MapReduce, Apache Spark, PySpark, Apache Hive
Machine Learning / Data Science: Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn
Tools & Environments: Docker, Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, Linux (Ubuntu)

Languages & Activities

Languages: Arabic (Native) | French (B2 – Professional) | English (B2 – Upper-Intermediate)
Activities: **Club Jeune Ingénieur** – Participated in technical workshops and student engineering events |
Competitive Programming – Solved algorithmic challenges in national coding contests
